

WHAT IS LIHEAP?

The Missouri Low Income Home Energy Assistance Program has two components — EA (Energy Assistance) and ECIP (Energy Crisis Intervention Program). Since both are a part of the LIHEAP program, the eligibility requirements for them are the same, including the requirement that applicants be at or below 135% of the established Federal Poverty Level (FPL) to receive assistance.

The Low Income Home Energy Assistance Program (LIHEAP) helps keep families safe and healthy through initiatives that assist families with energy costs. LIHEAP can help you stay warm in the winter and cool in the summer through programs that reduce the risk of health and safety problems that arise from unsafe heating and cooling practices. During the last several years, CMCA has helped nearly 7,000 families annually restore or maintain their utilities through LIHEAP throughout central Missouri.

This project is funded 90% at \$3,196,122 by federal funds and 10% at \$319,612 by non-governmental sources for a total amount of \$3,515,734. The federal funds are received from the U.S. Department of Health and Humans Services (HHS) provided by the Missouri Department of Social Services, Family Support Division
